Your nightmare is just the beginning...

S.U.N.D.S

(Sudden Unexpected Nocturnal Death Syndrome)

A sleepy village in Cambridgeshire is about to be gripped in a reign of terror by a new resident, a strange young woman called Dayanira. The fact that the meaning of her name is: devastating, capable of great destruction, is no coincidence.

What first appear to be two unexplained nocturnal deaths soon turn out to be something far more sinister – something with an insidious agenda.

Sudden Unexpected Nocturnal Death Syndrome (S.U.N.D.S) is a genuine unexplainable medical condition that kills hundreds of – otherwise healthy – young people every year – typically males – leaving pathologists perplexed as to the cause of death.

There is one school of thought, however – within certain circles – that SUNDS is explainable, only it's not an explanation that most mortals would want to hear, or believe, because the explanation is just too shocking, terrifying and disturbing to comprehend.

Currently, there is no treatment or preventative cure for SUNDS – at least not medically...

About the Author

Nigel Cooper is a British author of contemporary fiction and crime. He found his 'voice' as the editor of his own magazine, which he founded in 2004 and ran for seven years before becoming a full-time author of fiction in November 2011. Prior to this he studied screenwriting in London and ran a successful video production company. He also has a wealth of experience as a freelance journalist, writing articles, reviews and stories for numerous magazines and newspapers. Nigel also has a degree in classical piano performance and loves nothing more than to sit and play Chopin Nocturnes and Beethoven Sonatas when he isn't writing. Nigel lives and writes in Cambridgeshire, England.

"SUNDS is a disturbing tale that will haunt you long after you've finished reading it."
